

REMARKS

The applicants have amended the structures in claim 14 by reducing the maximum number of R⁵ substituents on the pyridine-containing structure to 3 and on the pyrimidine-containing structure to 2. This merely corrects an obvious error by making the maximum number of R⁵ substituents correspond to the maximum number of substitutable positions on the pyridine and pyrimidine rings, respectively. The applicants submit that these amendments introduce no new subject matter and do not require substantive search or examination. Their entry is respectfully requested.

If it is believed that a teleconference will advance prosecution, the examiner is encouraged to contact the undersigned as indicated below.

Respectfully submitted,

Date: July 25, 2011
